Problem

Couples don't have an easy way of keeping track of films watched together, remembering really good movies, and organizing movies watched across different streaming platforms.

Objective

- The website organizes the entire history of movies watched together as a couple
- Movies can be rated and added to the library

Features and functionality

- Homepage with movie library**(Must have)**
- Add movies to the library**(Must have)**
- Add additional information about movie manually**(Could have)**
- Access movie info via API**(Won't have)**
- Delete a movie**(Could have)**
- Edit movie info**(Could have)**
- Organize movies by genre**(Could have)**
- Organize by date watched**(Must have)**
- Organize by streaming platform**(Won't have)**
- Add ability to make comments**(Should have)**
- Add the ability to have different users with their respective libraries**(Could have)**
- Add functionality to like or dislike a movie**(Must have)**
- Share movie info ability**(Won't have)**
